### ***Response to Amendment***

The present claim amendments render the previous 112 and 103 rejections moot.

### ***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance:

Both of the independent claims positively recite the following limitation:  
"calculating data formed as a series of tokens, wherein an initialization token of the series of tokens is configured to enable an authentication session to be opened and

Art Unit: 2431

tokens of the series of tokens other than the initialization token are configured to enable the authentication session to be maintained; producing an anonymous signature of the initialization token, the signatures being obtained using a private key associated with said public key and opening an anonymous authentication session with the server, wherein said anonymous signature is a unique signature used for said authentication session". The prior art of record is silent in explicitly teaching this limitation in combination with all of the other limitations of the claims.

***Allowable Subject Matter***

Claims 1, 2, 4-6, 9-14, and 16-22 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
